

Ajila Oluwatosin

Data Scientist | Machine Learning Engineer

Phone No: +2347039538209, E-mail: ajilaoluwatosinisaac@gmail.com

GitHub Portfolio: <https://github.com/ajilatosin>

Website: <https://ajilatosin.github.io/>

PROFESSIONAL SUMMARY

Results-driven Data Scientist and Machine Learning Engineer with expertise in predictive analytics, statistical modeling, machine learning, and data-driven decision-making. Experienced in building end-to-end data science solutions, from data collection and exploratory analysis to model development, evaluation, and deployment. Proficient in Python, SQL, machine learning frameworks, and data visualization tools, with a strong ability to translate complex data into actionable business insights. Skilled at solving real-world problems across diverse domains through analytical thinking, experimentation, and scalable AI solutions. Committed to leveraging data and machine learning to drive innovation, optimize processes, and support strategic business objectives.

EDUCATION

University of Ilorin, Ilorin, Kwara, Nigeria

Oct. 2018 – Oct. 2023

Bachelor of Science (B.Eng.) in Materials and Metallurgical Engineering

Final Grade: Second Class Honours (Upper Division) | CGPA: 3.96/5.00

SKILLS

Technical Skills:

- Programming Language: Python, SQL (MS SQL Server), HTML, CSS
- Data Science & ML: Data Cleaning, EDA, Feature Engineering, Predictive Modeling, Model Evaluation
- Libraries & Tools: Pandas, NumPy, Scikit-learn, XGBoost, Matplotlib, Seaborn, Git, GitHub
- Deployment & Development: FastAPI, Docker, Hugging Face, Streamlit
- Core Competencies: Problem Solving, Analytical Thinking, Data Storytelling, End-to-End ML Workflow

FEATURED PROJECTS

Credit Card Fraud Detection System | Python, Scikit-Learn, FastAPI, Streamlit, Docker

Real-Time Fraud Detection Using Machine Learning

- Developed an end-to-end machine learning system to detect fraudulent credit card transactions in real time.
- Achieved 99.95% accuracy, 89.23% precision, 78.4% recall, and an 83.75% F1-score using a Random Forest classifier.
- Deployed the solution using FastAPI, Streamlit, Docker, and Hugging Face Spaces for interactive fraud monitoring and prediction.

BNPL Credit Risk Assessment System | Python, Scikit-Learn, Streamlit

- Developed a machine learning solution to assess credit risk in Buy Now, Pay Later (BNPL) transactions using CatBoost.
- Built a hybrid decision system for automated approvals, rejections, and manual reviews, achieving a test AUC of 0.788 and reducing manual underwriting workload through risk-based automation.

Marketing A/B Testing & Conversion Analysis | Statistical Analytics Project

- Conducted A/B testing and statistical hypothesis analysis to evaluate digital marketing campaign performance using Python, Pandas, SciPy, and Statsmodels.
- Identified a statistically significant increase in conversion rates and provided actionable recommendations on campaign optimization, audience targeting, and budget allocation to improve marketing ROI.

CERTIFICATION

AI Prompt Engineering | ALX Africa, Lagos, Nigeria.

May 2024 - June 2024

Data Scientist Bootcamp | GomyCode, Lagos, Nigeria.

January 2025 - July 2025

Data Scientist Certification | DataCamp.

May 2026 – June 2026
